CITY ENGINEER/DPS DIRECTOR

November 2021

Residents and Businesses on Loring Avenue: from Oakview Avenue to Forest River Bridge

Re: Notification of Emergency Water Main Replacement Project

This notice has been prepared to inform you that the City of Salem will be starting an emergency construction project to improve the functionality and reliability of the water system on Loring Avenue. The project will include replacing a portion of the 16-inch main with new valves, and hydrants.

Beginning the week of November 8th, the City's Contractor (N. Granese & Sons, Inc.) will mobilize to the site and begin rehabilitating the water main on a portion of Loring Avenue from #446 Loring Avenue to the Forest River Bridge. This work is expected to take approximately one month to complete, but schedule may be extended by weather.

The work hours for this effort will be 7:00 am to 4:00 pm. During this project, the area will be an active construction site and you should be careful and drive at a reduced speed accordingly. Police details will be present to assist everyone through the work zone and to facilitate traffic management during working hours.

Please contact Rachel McCarter, New England Civil Engineering Project Engineer at 978-973-6531 with any questions regarding the project.

We apologize in advance for any inconvenience you may incur during this process. The City appreciates your patience and forbearance during this project. If you have any questions, or require additional information, please call my office at 978-619-5673.

Sincerely,

David H. Knowlton, PE
City Engineer/DPS Director
